

ENTREPRENEURSHIP IN 2021: NEBRASKA SNAPSHOT

Entrepreneurship is important for job creation, innovation, and the economy. This brief provides a snapshot of various indicators related to early-stage entrepreneurial activity in Nebraska.

How many people are becoming entrepreneurs?

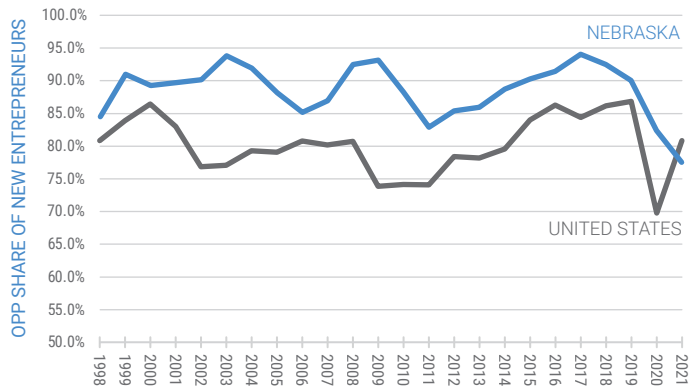

Since 2006, the rate of new entrepreneurs in Nebraska has been below the national rate.

In Nebraska, the rate of new entrepreneurs in 2021 was **0.28%**, meaning that **2.8 out of every 1,000 adults became new entrepreneurs, on average, in a given month**. This compares to 0.36% nationally.

How many new entrepreneurs created their business out of opportunity?

The opportunity share of new entrepreneurs has been higher in Nebraska compared to the rest of the nation since 1998, with the exception of 2021.

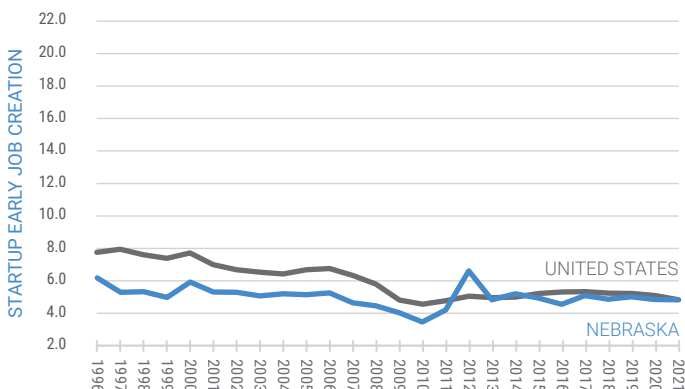

The opportunity share of new entrepreneurs was **77.5% in Nebraska in 2021**, compared to 80.9% nationally.

How many jobs are created by new businesses?

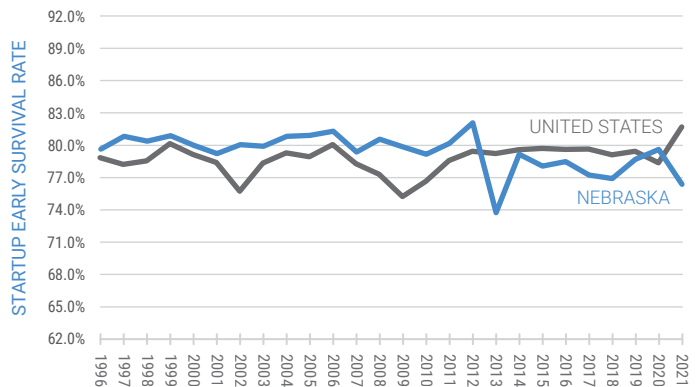

In recent years, the number of jobs created per 1,000 people in Nebraska has been similar to the national average.

There were **4.8 jobs created by startups per 1,000 people in Nebraska in 2021**, compared to 4.7 jobs created by startups at the national level.

How many businesses survive their first year?

In recent years, the share of startups that survive at least one year has been lower in Nebraska compared to the national level, with the exception of 2020.

In 2021, **76.4% of startups in Nebraska survived at least one year**, compared to 81.7% of startups at the national level.

ABOUT THE DATA: Each of the indicators presented above come from the Kauffman Early-Stage Entrepreneurship Indicators. The rate of new entrepreneurs and the opportunity share of new entrepreneurs are calculated using 3-year moving averages. Startup early job creation and startup early survival rates are based on data from March 2021, and do not reflect the full effects of the pandemic.
